EXPERIENCE

StudiWeb

Software Engineer
Castellana Grotte, BA

April 2023 – Present

- Introduced automated CI/CD pipelines, cutting deployment time from 35 minutes to under 10 and failed releases by 40%
- Developed the company's main website, contributing to a 30% increase in customer acquisition and conversion rates
- Isolated overloaded sites and resolved resource bottlenecks, cutting peak-hour database load by 38%
- Led migrations of internal tools and websites to the cloud, reducing hosting cost by 30% and maintenance time by 45%
- Mentored new engineers and wrote SaaS feature documentation, standardizing workflows and cutting onboarding time

TourMake

Software Engineer Intern
Castellana Grotte, BA

August 2021 – March 2023

- Built and shipped client-specific feature customizations on the core SaaS platform across 7 client projects
- Collaborated with senior engineers in architecture reviews, proposing two approved API-versioning approaches
- Built a managed SEO blog platform from a legacy WordPress DB, lifting organic traffic 40%
- Diagnosed and fixed production bugs across the codebase, cutting recurring error tickets by 20%

PROJECTS

AI Travel Itinerary Planner

Technologies: Gemini API, FastAPI

- Built a generator that turns a searched location into a custom trip of wineries, food spots, and hotels via Gemini
- Embedded Google Maps with an ordered stop-by-stop route and a side chat for live itinerary refinement

Help Desk & Workforce Management System

Technologies: React, Docker

- Implemented task lifecycle tracking with status, priority, and automated time logging for better productivity visibility
- Containerized the full stack with Docker Compose, reducing local setup time for new contributors to under 5 minutes

E-Commerce Platform & Operations Management

Technologies: PHP, JavaScript, SQL

- Owned the project end to end – sourced the client, ran client communication, and coordinated the dev team
- Built the prize-draw engine in PHP/SQL: each purchase generated entries and a randomized draw picked winners
- Designed the database schema (products, orders, entries, draws, winners) linking purchases to draw eligibility

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, PHP, Bash, SQL, HTML, CSS

Frameworks and Tools: React, Angular, Symfony, Laravel, Backbone, Docker, FastAPI

Concepts: OOP, Distributed Systems, Event-Driven Architecture, RESTful APIs, CI/CD, Machine Learning

EDUCATION

I.I.S.S. Luigi dell'Erba, Castellana Grotte, BA - [Google IT Support Professional Certificate](#)

- Relevant Coursework: Operating Systems, Database Management, Computer Networks, Data Structures and Algorithms (C, C++, Java, Assembly, PHP, SQL), Web Development (JavaScript)
